EDUCATION

SRM Institute of Science and Technology **2023 – 2027**
*B.Tech - Computer Science and Engineering - **CGPA - 9.66*** *Chennai, TN*

PROFESSIONAL EXPERIENCE

Jio Infocomm Limited **May 2026 – Jul 2026**
Software Engineering Intern *Remote*

- Developed a **real-time occupancy analytics platform** using YOLOv8, OpenCV, and React to monitor **20+ concurrent CCTV streams**, transforming video feeds into actionable space-utilization insights.
- Designed **interactive analytics dashboards** and FastAPI services to surface live occupancy, historical utilization trends, and peak-hour patterns, supporting data-driven capacity planning and resource allocation.

Samsung Research & Development Center India **Mar 2025 – Jan 2026**
Research & Development Intern *Remote*

- Developed an **AI-powered natural-language-to-SQL solution** using RAG and LLMs, simplifying database access through schema-aware query generation and automated SQL optimization.
- Established an **automated benchmarking framework** across **500+ SQL queries**, evaluating query accuracy and execution performance to achieve approximately **90% SQL accuracy** and **68–79% execution speedups** across benchmarked scenarios.

PROJECTS

Signal – Intent-Aware Market Watchlist | *React, TypeScript, Node.js, PostgreSQL, Redis, Socket.IO*

- Addressed information overload among retail investors by building an **intent-aware watchlist** that delivers personalized alerts based on users' buy, sell, earnings, and 52-week objectives.
- Developed a real-time signal and notification engine combining market movements, volatility-aware insights, and user activity to **prioritize relevant updates**.
- Ranked among the **Top 15 of 860 national submissions** at Code by Groww; pitched product strategy and technical architecture to an industry panel at Groww's Bengaluru headquarters.

DevHive – AI-Powered Developer Matchmaking Platform | *Django, React, TypeScript, Supabase, Python, LLMs*

- Simplified developer discovery by building a **two-sided collaboration platform** that matches developers through personalized, skill-based recommendations.
- Created an AI-driven compatibility engine combining **LLM-based resume parsing, GitHub activity analysis, and skill similarity scoring** to generate explainable developer matches.
- Integrated GitHub OAuth, ranked match feeds, and real-time messaging to convert developer recommendations into **meaningful collaboration opportunities**.

Codenza – AI-Powered Coding & Interview Readiness Platform | *React, Node.js, MongoDB, Redis, Docker, AWS*

- Bridged the gap between coding practice and interview preparation through an **integrated platform** combining automated code evaluation with AI-generated learning assistance.
- Introduced an **interview-readiness model** evaluating topic coverage, accuracy, problem difficulty, and coding consistency to identify learning gaps and recommend targeted practice.
- Implemented asynchronous code evaluation using **Redis/BullMQ and Docker-isolated execution**, enabling secure code judging and deployment across AWS EC2 and Vercel.

LEADERSHIP & POSITIONS OF RESPONSIBILITY

IEEE SRM Student Branch – Technical Lead **2026**

- Led a **30-member technical team** and contributed to the official IEEE website, which reached **2,000+ users during recruitment**.
- Led backend recruitment and coordinated a hackathon and campus recruitment, managing technical evaluations for **100–200 applicants**.

ICPC Taiwan 2024 – Team Leader **2024**

- Led the SRMIST team to **National Rank 14** through collaborative competitive programming.

Smart India Hackathon (SIH) – Team Leader **2025**

- Led a multidisciplinary team in developing and presenting an innovative solution, advancing to the **institute-level finalist stage**

TECHNICAL & PRODUCT SKILLS

Product: Product Ideation, Feature Prioritization, User-Centric Design, UI/UX Design, Prototyping, Product Development
Leadership & Interpersonal: Team Leadership, Cross-Functional Collaboration, Stakeholder Communication, Technical Presentations, Problem-Solving
Data & Analytics: Python, SQL, Data Analysis, Performance Benchmarking, Analytical Thinking
AI/ML: Machine Learning, LLMs, RAG, NLP, Recommendation Systems, scikit-learn
Technical: C++, Java, TypeScript, React, Node.js, Django, FastAPI, PostgreSQL, Redis, AWS, Docker

ACHIEVEMENTS

- **National Semifinalist** – Flipkart GRiD 8.0; **National Finalist** – Code by Groww 2026.
- Selected among the **Top 50 of 3000+ applicants** for Samsung PRISM India; received an **Excellence Award** as a **Top 5 team**.
- Co-authored *"ForestEye: RGB-Based Deforestation Detection and CO_2 Stock Assessment Using U-Net with CBAM,"* published at **IEEE ICSC 2026**.
