EDUCATION

SRM Institute of Science and Technology — **Chennai, Tamil Nadu**
B.Tech, Computer Science and Engineering — ***CGPA: 9.66/10*** — *2023 – 2027 (Expected)*

PROFESSIONAL EXPERIENCE

Jio Infocomm Limited — **May 2026 – Jul 2026**
Software Engineering Intern — *Remote*
- Built a real-time occupancy analytics platform using YOLOv8, OpenCV, and React to monitor **20+ CCTV streams**, turning raw video feeds into actionable space-utilization insights.
- Designed FastAPI services and interactive dashboards for live occupancy, historical trends, and peak-hour utilization, supporting data-driven capacity and resource planning.

Samsung PRISM India — **Mar 2025 – Jan 2026**
Research & Development Intern — *Remote*
- Developed an AI-powered natural-language-to-SQL solution using RAG and LLMs, enabling non-technical users to query databases through schema-aware query generation and optimization.
- Built an automated evaluation framework across **500+ SQL queries**, achieving ∼**90% SQL accuracy** and **68–79% execution speedups** in benchmarked scenarios; recognized as a **Top 5 team** (Excellence Certificate).

PRODUCT PROJECTS

Signal — Smart Market Watchlist | *React, TypeScript, PostgreSQL, Redis, Socket.IO*
- Identified information overload among retail investors and built an **intent-aware watchlist** delivering personalized alerts based on each user's buy, sell, earnings, and 52-week objectives.
- Designed a real-time signal and notification system combining market movements, volatility-aware insights, and user last-seen activity to prioritize the most relevant updates.
- Selected as a **Top 15 national finalist out of 860 submissions** at Code by Groww; pitched the product and architecture to an industry panel at Groww's Bengaluru HQ.

DevHive — AI-Powered Developer Matchmaking | *Django, React, TypeScript, Supabase, LLMs*
- Built a two-sided collaboration platform that solves the problem of finding compatible teammates through personalized, skill-based recommendations.
- Designed a compatibility and ranking engine combining LLM-based resume parsing, GitHub activity analysis, and weighted skill-similarity scoring to produce **explainable developer matches**.
- Shipped an end-to-end experience with GitHub OAuth, ranked match feeds, and real-time messaging to turn matches into connections.

Codenza — AI-Powered Coding & Interview Prep Platform | *React, Node.js, MongoDB, Redis, Docker, AWS*
- Built and deployed an end-to-end coding practice platform with automated code evaluation and AI-generated learning assistance for interview preparation.
- Designed an **interview-readiness model** combining topic coverage, accuracy, problem difficulty, and consistency to surface learning gaps and recommend targeted practice.
- Shipped asynchronous, sandboxed code execution using Redis/BullMQ workers and Docker, deployed on AWS EC2 and Vercel.

LEADERSHIP & POSITIONS OF RESPONSIBILITY

IEEE SRM Student Branch — **2026**
Technical Lead, AI/ML & Full Stack — *SRMIST, Chennai*
- Led a **30-member technical team**, coordinating development initiatives and contributing to the **official IEEE SRM Student Branch website**.
- Coordinated **2 major initiatives** (a hackathon and technical recruitment); as Backend Recruitment Lead, managed technical evaluation of **100–200 applicants**.

ICPC Taiwan 2024 — **2024**
Team Lead, SRMIST Competitive Programming Team — *Taiwan*
- Led the SRMIST team through preparation and contest strategy, securing **National Rank 14**.

Smart India Hackathon
Team Member
- Collaborated in a multidisciplinary team to build and present a technical solution to evaluators.

ACHIEVEMENTS & PUBLICATIONS

- **National Rank 14**, ICPC Taiwan 2024 | **National Semifinalist**, Flipkart GRiD 8.0 | **Top 15 Finalist**, Code by Groww 2026.
- Selected among the **Top 50 of 3000+ applicants** for Samsung PRISM India.
- Co-authored "ForestEye: RGB-Based Deforestation Detection and CO_2 Stock Assessment Using U-Net with CBAM," published at **IEEE ICSC 2026**.

TECHNICAL & PRODUCT SKILLS

Product: Product Ideation, Feature Prioritization, Prototyping, User-Centric Design, Technical Presentations, Cross-Functional Collaboration
Data & AI/ML: Python, SQL, Data Analysis, Machine Learning, LLMs, RAG, NLP, Recommendation Systems, scikit-learn
Engineering: C++, Java, TypeScript, React, Node.js, Django, FastAPI, PostgreSQL, Redis, AWS, Docker, Git
